Sealweld

TOTAL LUBE #911

Total-lube #911 is our superior grade synthetic lubricant sealant is the perfect solution for worn and damaged valves. This specially formulated sealant not only provides long-lasting protection but also helps to restore the performance of your valves. With its advanced technology, this sealant creates a strong barrier that prevents leaks and reduces friction, thereby extending the lifespan of your valves. Whether you are dealing with worn-out seals or damaged valves, this synthetic lubricant sealant will ensure that your equipment operates smoothly and efficiently. Trust in our product to deliver superior results and keep your valves in top condition for longer.

Total-lube #911 is engineered to form an insoluble lubricant film that effectively protects sealing surfaces. The inclusion of micronized PSP particles enables it to seal minor scratches and shallow corrosion pits measuring up to 0.010 inches. This product is specifically formulated as a versatile seat lubricant sealant, aimed at extending maintenance intervals for severe and critical service valves.

Total-lube #911 exhibits excellent insolubility in water, oil, natural gas, and associated by-products, making it suitable for applications involving hydrogen sulfide (H₂S) concentrations below 20%.

This lubricant is recommended for use with ball, gate, and plug valves, as well as orifice fittings. Ideal application sites include wellheads, pump or compressor stations, transmission lines, and gas distribution systems.

PRODUCT SPECIFICATION

Base Oil	Synthetic
Colour	White
Particle Size	Micronized
Composition	Semi-liquid
Temperature Range	- 29°C to + 232°C - 40°F to + 400°F

SIZE

120 lb. pail	422004
40 lb. pail	422010
10 lb. can	422002
15 oz. cartridge - 12 per/case	422022
11 oz. cartridge - 16 per/case	422019
J" Stick - 16 per/case	422006
